CS 40800: Phase 2 Black-Box Testing

Project Title: Trader Pete from Team 4

Team 3: Oi Kam Chow (ochow), Kuan-Ting Wu, Ley Yen Choo, Ryan Teo Yii Wen, WeiYuan Chung, Yuang Huang

Defect No.	Defect Description	Defect Severity	Test Case No. OR Description
1	Be able to create an account with less than 8 characters	2	1.7
2	Be able to create an account when password and confirm password is different	2	Type in a legitimate password and a different confirm password. It successfully created an account
3	Be able to create an account with an invalid email	2	Type in xxx@purdue.com It successfully created an account It should be xxx@purdue.edu
4	No error message when login with an invalid password	2	1.9.4
5	Be able to create an account with more than 256 characters	2	1.8
6	No error message when login with an invalid username	2	1.9.3
7	Be able to logout without logging in. The use case of logout in product backlog said that user can see the logout button after log in yet the button is always there without logging in and clicking on it leads to the logout message.	2	Go to the website and click on the logout button on the sign in page without signing in.
8	Tag section is shown even when no tag is provided, but in the product backlog said it	3	Create an item listing with no tag and go to the

	should not.		detailed page of that item and look for the tag section.
9	Contact the seller is shown even when the user himself/herself is the seller, but in the product backlog said it should not.	3	Create an item listing and go to the detailed page of that item create using the same user account and look for the contact the seller section.
10	Sold item still exists in the list while the use case of view listing in product backlog said sold items should not be shown.	2	Mark an item as sold and check whether the item still exists in the item listing page.
11	Price filtering in search is not inclusive	2	4.8
12	Searching ignores symbols	2	5.3
13	Searching does not check if keywords exist in description	2	5.13
14	File not verified before uploading to the server	1	Uploaded a file, which was originally a script, but I manually changed its file name to .jpeg, and uploaded it successfully. The website should validate its binary magic code to verify if it's the file type the user claimed.
15	Exact 2 MB file can not be uploaded	1	6.5
16	System shows the location of a listing even if a user chose not to.	1	6.8 System should not show location of a listing if the user did not select "include location"
17	System allows a listing to be added even if the price is negative	1	6.10
18	System allows a listing to be added even if the title is only with 9 characters (less than 10 characters as defined in the product log)	1	6.12

19	System allows a listing to be added even if the description is only with 19 characters (less than 20 characters as defined in the product log)	1	6.15
20	No notifications received for unread messages, no number of unread messages is displayed anywhere	2	11.1
21	System did not notify user whether the action succeed or not when user clicks "sold"	3	12.1
22	Seller cannot rate the buyer if the buyer has no item listings because the seller cannot go to the buyer's profile page.	1	13.1.1 Rate the buyer by going to the buyer's profile page. The seller cannot find a link to the buyer's profile page.
23	User can rate another user despite it is not done after a purchase.	2	13.1.2
24	User cannot rate without comment; error message "Comment cannot be blank" is displayed.	2	13.3.1
25	User is able to rate himself/herself	3	13.5
26	Clicking on tags are said to show similar items. But it matches word by word and thus two tags that are not similar in meaning would still show. In our test case, because the two items both has the word "to", they are linked but they are actually not similar.	3	18.1 Create an item listing with tag "Good item to buy". Create another item listing with tag "An item to be tested". When click on the tag of the first item, the second one is shown.
27	Able to edit details with description more than 2000 characters/words.	2	21.4
28	Able to edit details for item listings that do not belong to the user.	2	21.9
29	There will be a message being shown repeatedly 2-3 times on the chat of either one of the users when the message is being sent	3	Opening 2 different accounts on separate tabs on the same browser, sending message to each other,

			there is a chance to trigger the scenario
30	System automatically logs out the user when user refresh the page	1	Refresh any page
